

Abderrahim Bouzidi

Senior Full-Stack Developer · React, Next.js, TypeScript

Profile

Full-stack developer with 7 years of experience, from freelance sites and e-commerce stores to a multi-tenant SaaS with a full payments stack. Strongest on React / Next.js / TypeScript, solid across tRPC, Node, PostgreSQL and Redis. Uses Claude Code daily to ship faster while owning design, architecture and testing. Fully remote since 2019 with teams in the USA, Canada, Australia and Saudi Arabia, on CET hours.

Experience

Full-Stack Developer (Freelance)

Eighty Eight Sports Institution, Saudi Arabia · Remote January 2026 – Present

- Building a multi-tenant gym management SaaS for the Saudi market, live with a first gym of 700+ members: Next.js dashboard, tRPC + Hono API, PostgreSQL (Drizzle), Redis/BullMQ workers, realtime WebSockets, bilingual English/Arabic (RTL).
- Implemented the complete payments stack: card payments (PayTabs), BNPL (Tabby, Tamara), durable payment links, webhook processing, refunds with settlement windows and ZATCA-compliant e-invoicing.
- Built a front-desk kiosk desktop app (Tauri 2, Rust + React) with device-key authentication, plus a Rust/Typst service generating invoices and reports.
- Own features end to end, from design doc to tests, using Claude Code to speed up delivery.

Full-Stack Developer (Freelance)

Flux Interactive, Australia · Remote January 2025 – December 2025

- Built the front end of Logix, a point-of-sale system now in production in retail stores, owning almost all of the UI/UX (React, TypeScript, Tailwind).
- Extended the tRPC back end and evolved the PostgreSQL schema with Drizzle ORM.

Full-Stack Developer

Growth Lab Media (now The Web Is Mine), Québec, Canada · Remote

November 2023 – January 2025

- Shipped three client sites, including Dupond et Dupont (e-commerce) and two car-sales platforms, all responsive and mobile-optimized, plus the agency's own site, The Web Is Mine.
- Added realtime features over WebSockets (Deals of the Day feed, product listings) and a React + React Query single-page app with clearly better performance.
- Helped the team on other projects with back-end fixes and database structure improvements.

Full-Stack Developer (Freelance)

Lynck Tech Solutions, USA · Remote April 2023 – October 2023

- Delivered front-end and back-end work on client projects (Sandbar, Neat, The Forge) with React, Next.js, Express and SQL.
- Created a reusable component library with Tailwind and DaisyUI that cut the time needed to build new features.

Freelance Web Developer

Fiverr and direct clients · Remote 2019 – 2023

- 30 completed projects on Fiverr with a 5-star rating: business websites, landing pages, e-commerce stores and React / Next.js web apps for international clients.
- Handled each project end to end, from scoping to deployment and support, while finishing a software engineering degree.

Education

Licence (Bachelor's degree) in Information Systems and Software Engineering

University of Skikda, Algeria 2020

Details

Béjaïa, Algeria

Remote (CET), open to contract or full-time
